# IMAGE EDITOR

for SharePoint

## Image Editor for SharePoint

Provides a simple & Powerful way to edit and enhance any image directly within the SharePoint environment.

Once the SharePoint Image Editor Add-In is installed you can open and edit your Images from SharePoint or a local path. Any Images contained within a SharePoint library will have the option to edit the image directly from the image's Context Menu "Image Editor".

Use it to add resize and image and prefer a stock image or photo for further use in a document or page. Once the edits have been done, you can save as a .editor file to keep the images and changes separate.

This application was the one we were most asked to build by our loyal customer base.

Add Shadows and Frames around an Image

PNG with Transparency support & JPG

Available in the Microsoft Store now
