Page Guide for SharePoint

The simple, fast and most effective way to add interactive help within your SharePoint pages using a step-by-step walk through

Easy to use Page Builder to create the guides, no code needed

Highlight & Focus on the important elements

Available in the Microsoft Store now

SharePoint Page Guide is the simple, fast and most effective way to incorporate interactive help within your SharePoint pages by way of step-by-step walk-through for selected page elements. SharePoint Page Guide helps SharePoint users to learn and understand the platform and applications built on top of SharePoint interactively, with live contextual help.

SharePoint Page Guide is extremely powerful and precise. The add-in includes the Page Guide Builder from where you can add contextual help to any SharePoint page element.

One of the major benefits of using these step by step walk through is a dramatic decrease in the number of support calls and tickets with requests for help relating to the application to which it is available. SharePoint Page Guide can be used for many use cases (e.g. change management, on-boarding, training, support etc.) and will add benefit to every SharePoint platform.

1. Define Page Elements

2. Create Page Guide

3. Provide Interactive Page Help
